

EYELASH EXTENSION TAKE HOME INSTRUCTIONS

A full set of lash extensions can make the appearance of my own lashes about 30-50% thicker, and make my lashes appear 20-50% longer.

Lash extension services have some inherent risk of irritation to the orbital eye area, including the eye itself, and could result in stinging and burning, and blurry vision should the adhesive enter the eye or should an allergic reaction occur. If bonding comes in contact with your eyes, flush with water immediately.

Dome irritation, itching or burning may occur on the skin if the bonding agent comes into contact with it.

Lash extensions are a semi-permanent procedure. As the natural lashes will continue to grow and fall out normally, making touch-up or "fill" appointments is necessary to maintain the original look achieved by replacing the lashes that have fallen out. Most clients require a fill appointment every 2-3 weeks.

No rubbing of the eye area.

No oil based products such as make up remover or cleanser on the eye area.

No waterproof mascara. It is encouraged to not wear any mascara to increase longevity of the lashes.

Wash with luke warm, plain water.

Use the lash brusher every day after cleansing with warm water.

No picking or peeling if a lash comes loose. Allow the lashes to fall off on their own.

If you have any additional questions or concerns please call the office at 513-791-9474 ext. 2
